

Pioneer Growers was founded in 1950 when a small group of local farmers established a marketing co-op to better handle & market their fresh produce. Today, Pioneer grows more than 6,000 acres of green beans, radishes, celery & cabbage. Pioneer Growers is located in Belle Glade, Florida.

Radishes

- Radishes are a root vegetable known for their mild to sharp “bite,” or spice.
- All parts of the radish are edible - seed, root, and leaf.
- Radishes are easy to sprout and grow. They only need four weeks to transform from a tiny seed to a round, juicy root bursting with flavor.
- Each December in Mexico, there is a festival dedicated to carving elaborate sculptures out of radishes.

🌱 **Radishes are an excellent source of vitamin C!**

**Locally grown
Radishes served
in your café!**
